PART 1 A Guide to Writing Effectively

Chapter 1 Why We Write

Understanding Writing	7
Writing in College	8
Writing in the Workplace	14
Writing as a Citizen	15
Writing to Understand Ourselves	17

Chapter 2 Ten Core Concepts for Effective Writing

The Ten Core Concepts for Effective Writing	22
Core Concept 1	Writing is a process of discovery and learning. 22
Core Concept 2	Good writing fits the context. 26
Core Concept 3	The medium is part of the message. 31
Core Concept 4	A writer must have something to say. 34
Core Concept 5	A writer must support claims and assertions. 36
Core Concept 6	Purpose determines form, style, and organization in writing. 41
Core Concept 7	Writing is a social activity. 44
Core Concept 8	Revision is an essential part of writing. 47
Core Concept 9	There is always a voice in writing, even when there isn't an I. 50
Core Concept 10	Good writing means more than good grammar. 55

Chapter 3 The Ten Core Concepts in Action

Step 1	Discover and explore a topic. 60
	Begin with a Question 60
	Explore Your Questions 61
	Select a Working Topic 61

Identify What You Know about Your Topic	62
Adjust Your Question	63
Use Technology to Generate Ideas and Gather Information	63
Write a Discovery Draft	64
Step 2 Examine the rhetorical context.	65
Identify Your Audience	65
Consider the Context	66
Review Your Question	66
Develop Your Discovery Draft	67
Step 3 Select an appropriate medium.	67
Select a Medium	68
Consider How the Medium Might Shape Your Project	69
Return to Your Discovery Draft	69
Step 4 Have something to say.	70
Revisit Your Main Question	70
Write a Guiding Thesis Statement	70
Review Your Discovery Draft	71
Revise Your Guiding Thesis Statement	71
Step 5 Back up what you say.	71
Identify Your Main Claims or Assertions	72
Review Your Discovery Draft	73
Write a Complete Draft	73
Step 6 Establish a form and structure for your project.	74
Identify the Main Parts of Your Project	74
Develop an Outline	75
Refine Your Outline	75
Write or Revise Your Draft	76
Step 7 Get feedback.	76
Consider Peer Review and Other Kinds of Feedback	76
Ask Your Readers to Respond to Your Draft	77
Identify Common Themes in Your Readers' Responses	78
Consider Conflicting Advice in Your Readers' Responses	78
Identify Possible Revisions on the Basis of Your Readers' Feedback	79
Step 8 Revise.	79
Focus First on Content	80
Focus Next on Form	80

Consider Your Rhetorical Situation	81
Revisit Your Introduction and Conclusion	81
Prioritize Your List of Potential Revisions	82
Step 9 Strengthen your voice.	83
Consider Your Rhetorical Context	83
Consider Whether You Should Use the First Person	84
Strengthen Your Voice	84
Step 10 Make it correct.	85

Chapter 4 A Student Writer Applies the Core Concepts

Step 1 Discover and explore a topic.	87
Step 2 Examine the rhetorical context.	92
Step 3 Select an appropriate medium.	93
Step 4 Have something to say.	94
Step 5 Back up what you say.	95
Step 6 Establish a form and structure for your project.	101
Step 7 Get feedback.	103
Step 8 Revise.	107
Step 9 Strengthen your voice.	115
Step 10 Make it correct.	116
<i>Why Is College So Important in the United States?</i> by Chloe Charles	117

PART 2 Writing to Analyze

Chapter 5 Understanding Analytical Writing

Occasions for Analytical Writing	125
Understanding Analytical Writing in College	129
A Desire to Understand	130
A Careful Examination of the Evidence	131
Well-Reasoned Conclusions	132
Doing Analysis	133
Using a Framework	133
Making Reasonable Claims on the Basis of Available Information	136
Supporting Claims	140
Features of Analytical Writing	144
<i>Why Are People Who Use Illegal Drugs Demonized?</i> by Gideon Lasco [Annotated Reading]	145

Chapter 6 Examining Causes and Effects

Occasions for Causal Analysis 161

Understanding Causal Analysis 162

Reading Causal Analysis 164

- Pandemics and Social Capital: From the Spanish Flu of 1918–19 to COVID-19*,
by Arnstein Aassve, Guido Alfani, Francesco Gandolfi, and Marco Le Moglie 165
- Is It Even Possible to Connect “13 Reasons Why” to Teen Suicide?* by Emily Lund and
Michael R. Nadorff 170
- The Roots of Schizophrenia: The Effects of Growing Up with a Schizophrenic Parent*,
by Mehr Sharma 173

Writing Causal Analysis 177

Step 1 Identify a topic for causal analysis. 178

Step 2 Place your topic in rhetorical context. 179

Step 3 Select a medium. 179

Step 4 Identify your main claim. 180

Step 5 Support your claim(s). 181

Step 6 Organize your causal analysis. 183

Step 7 Get feedback. 187

Step 8 Revise. 188

Step 9 Refine your voice. 189

Step 10 Edit. 189

Writing Projects 189

Chapter 7 Comparing and Synthesizing

Occasions for Comparing and Synthesizing 194

Understanding Comparison and Synthesis 195

A Reason for Comparison 196

A Basis for Comparison 196

Reading Comparative Analyses 198

- The Whole Truth*, by Julian Baggini 199
- Online Learning during the COVID-19 Pandemic: What Do We Gain and What Do We Lose*
When Classrooms Go Virtual? by Yoshiko Iwai 202
- Sherlock Holmes Can Teach You to Multitask*, by Maria Konnikova 206

Writing Analysis Involving Comparison and Synthesis 208

Step 1 Identify a topic for comparative analysis. 210

Step 2 Place your topic in rhetorical context. 210

Step 3 Select a medium. 211

Step 4 Identify your main claim. 212

Step 5 Support your claim(s). 214

Step 6 Organize your comparative analysis. 216

Organizing Your Comparative Analysis According to a Point-by-Point
Comparison 217

Organizing Your Comparative Analysis According to Your Main Claims 218

Step 7 Get feedback. 220

Step 8 Revise. 221

Step 9 Refine your voice. 222

Step 10 Edit. 222

Writing Projects 222

Chapter 8 Conducting Rhetorical Analysis

Occasions for Rhetorical Analysis 225

Understanding Rhetorical Analysis 227

Basic Rhetorical Analysis 228

Using Classical Rhetorical Theory for Rhetorical Analysis 231

Stylistic Analysis 235

Analyzing Images 238

Reading Rhetorical Analysis 243

How DC Mayor Bowser Used Graffiti to Protect Public Space, by Rebekah Modrak 243

Earthrise, a Photo That Changed the World, by Simon Torok, Colleen Boyle, Jenny Gray,

Julie Arblaster, Lynette Bettio, Rachel Webster, and Ruth Morgan 247

A Rhetorical Analysis of the TED Talk by Model Cameron Russell, by Kayla Ferderigos 250

Writing Rhetorical Analysis 253

Step 1 Identify a topic for rhetorical analysis. 254

Step 2 Place your topic in rhetorical context. 255

Step 3 Select a medium. 257

Step 4 Identify your main claim and develop your analysis. 258

Step 5	Support your analysis.	260
Step 6	Organize your rhetorical analysis.	262
Step 7	Get feedback.	266
Step 8	Revise.	267
Step 9	Refine your voice.	268
Step 10	Edit.	268
Writing Projects		268

Chapter 9 Analyzing Literary Texts

Occasions for Analyzing Texts 272

Understanding Textual Analysis 274

Interpretation 274

Evidence 274

Summary 274

Terminology 274

Reading Textual Analysis 276

Watchmen and the Birth of Respect for the Graphic Novel, by Karl Allen 277

More Than an Elephant in the Room: A Literary Analysis of Hemingway's "Hills Like White Elephants", Adapted from an essay by Natalie Huebel 280

Dangerous Illusions, by Caetlin Benson-Allott 283

Writing Textual Analysis 286

Step 1 Identify a topic for textual analysis. 287

Step 2 Place your topic in rhetorical context. 289

Step 3 Select a medium. 289

Step 4 Develop your interpretation and identify your main claim. 290

Step 5 Support your interpretation. 292

Step 6 Organize your textual analysis. 293

Step 7 Get feedback. 294

Step 8 Revise. 295

Step 9 Refine your voice. 295

Step 10 Edit. 295

Writing Projects 295

Chapter 10 Evaluating and Reviewing

Occasions for Evaluating and Reviewing 299

Understanding Reviews and Evaluation 301

Criteria for Evaluation 301

A Summary or Description of What Is Being Evaluated 302

A Reason for the Review 302

Something Relevant to Say 302

Reading Reviews 303

Review of Thirteen Reasons Why by Jay Asher, by Bryan Gillis 304

Microsoft Flight Simulator *Review: Buckle In and See the World*, by Keith Stuart 306

Psycho at 60: The Enduring Power of Hitchcock's Shocking Game-Changer, by Scott Tobias 308

Writing Evaluations and Reviews 311

Step 1 Identify a topic. 312

Step 2 Place your review in rhetorical context. 314

Step 3 Select a medium. 315

Step 4 Develop the main point of your review. 317

Step 5 Support your claim through your evaluation of your subject. 318

Step 6 Organize your review. 320

Step 7 Get Feedback. 322

Step 8 Revise. 323

Step 9 Refine your voice. 324

Step 10 Edit. 324

Writing Projects 324

PART 3 Writing to Persuade

Chapter 11 Understanding Argument

Occasions for Argument 329

Arguments to Solve a Problem 329

Arguments to Assert a Position 329

Arguments to Inquire 330

Arguments to Prevail 330

Understanding Argument in College 332

Making Arguments 339

- Developing a Main Argument 339
- Considering the Rhetorical Situation 341
- Making a Persuasive Appeal 342
- Making and Evaluating Supporting Claims 354
- Appraising and Using Evidence 358
- Structuring an Argument 363

Features of Argument 367

In Higher Education, the Wand Chooses the Wizard, by André M. Perry [Annotated Reading] 369

Chapter 12 Making Academic Arguments

Occasions for Academic Argumentation 376

Understanding Academic Argument: A Case Study 377

Reading Academic Arguments 381

- Fulfilling Her Mother's Dream*, by Patricia McGuire 382
- Crime and Punishment*, by Bruce Western 387
- The Skinny Truth: Why Government Intervention Is Necessary*, by Caroline Veldhuizen 389

Writing Academic Arguments 396

- Step 1** Identify a topic for argument. 397
- Step 2** Place your topic in rhetorical context. 398
- Step 3** Select a medium. 398
- Step 4** Identify your main argument. 399
- Step 5** Support main argument. 400
- Step 6** Organize your rhetorical argument. 402
- Step 7** Get feedback. 405
- Step 8** Revise. 406
- Step 9** Refine your voice. 407
- Step 10** Edit. 408
- Writing Projects 409

Chapter 13 Making Arguments in Public Discourse

Occasions for Public Argument 412

Understanding Argument in Public Discourse 414

Reading Public Arguments 422

- Trigger Warnings Don't Hinder Freedom of Expression: They Expand It*, by Lindy West 423
- Speech to the United Nations Climate Action Summit*, by Greta Thunberg 426
- Immigration in the Long Run: A Mutually Beneficial Process*, by Thu Hoang 427

Writing Arguments in Public Contexts 432

- Step 1** Identify a topic for argument. 433
- Step 2** Place your topic in rhetorical context. 434
- Step 3** Select a medium. 435
- Step 4** Identify your main argument. 436
- Step 5** Support your main argument. 438
- Step 6** Organize your argument. 440
- Step 7** Get feedback. 442
- Step 8** Revise. 443
- Step 9** Refine your voice. 445
- Step 10** Edit. 445
- Writing Projects 446

Chapter 14 Presenting a Proposal

Occasions for Writing Proposals 449

Understanding Proposals 452

Reading Proposals 458

- University of California Student Investment Proposal*, by Fix UC 458
- Puppies Behind Bars*, by Annie Teillon 462
- Proposal to Reduce the National Drinking Age*, by Choose Responsibility 467

Writing Proposals 474

- Step 1** Identify a project for your proposal. 474
- Step 2** Place your topic in rhetorical context. 476
- Step 3** Select a medium. 477
- Step 4** Identify your main points. 479
- Step 5** Support your main points. 480
- Step 6** Organize your proposal. 482
- Step 7** Get feedback. 483
- Step 8** Revise. 484
- Step 9** Refine your voice. 485
- Step 10** Edit. 485
- Writing Projects 485

PART 4 Writing to Narrate and Inform

Chapter 15 Understanding Narrative Writing

Occasions for Narrative 489

Understanding Narrative Writing in College 491

Telling Stories 500

Maintaining Focus 500

Structuring a Narrative 502

Writing Purposeful Description 504

Showing and Telling 506

Features of Narrative 507

The Art of Butchery, by Amanda Giracca [Annotated Reading] 508

Chapter 16 Writing Personal Narratives

Occasions for Personal Narrative 517

Understanding Personal Narrative 521

Reading Personal Narrative 525

The Balancing Act, by Haley Lee 526

Some Thoughts on Mercy, by Ross Gay 529

My Brother Caleb, by Libra Dolce 537

Writing Personal Narratives 539

Step 1 Identify a topic for your personal narrative. 540

Step 2 Place your topic in rhetorical context. 543

Step 3 Select a medium. 544

Step 4 Identify the main point of your narrative. 545

Step 5 Support your main point. 546

Step 6 Organize your narrative. 547

Step 7 Get feedback. 549

Step 8 Revise. 549

Step 9 Refine your voice. 551

Step 10 Edit. 552

Writing Projects 552

Chapter 17 Writing Literacy Narratives

Occasions for Literacy Narrative 556

Understanding Literacy Narratives 560

Reading Literacy Narratives 564

Reading, Writing, and Feeling, by Nicholas Johnson 565

Swimming Through Writer's Block at an Icelandic Public Pool, by Amanda Whiting 568

Listening to Hear, by Yasmin Zacaria Mikhael 572

Writing Literacy Narratives 575

Step 1 Identify a topic. 575

Step 2 Place your topic in rhetorical context. 577

Step 3 Select a medium. 578

Step 4 Identify the main point of your narrative. 580

Step 5 Support your main point. 581

Step 6 Organize your narrative. 582

Step 7 Get feedback. 584

Step 8 Revise. 586

Step 9 Refine your voice. 587

Step 10 Edit. 587

Writing Projects 588

Chapter 18 Writing Informative Essays

Occasions for Informative Writing 592

Understanding Informative Writing 593

Reading Informative Writing 600

Gamification: How Competition Is Reinventing Business, Marketing, and Everyday Life,
by Jennifer Van Grove 601

Perspective from the Field: Illegal Puppy Imports Uncovered at JFK Airport,
by Molly K. Houle 606

The Nature of Our Nature, by Anna Lappé 612

Writing Informative Essays 615

Step 1 Identify a topic. 616

Step 2 Place your topic in rhetorical context. 617

Step 3 Select a medium. 618

Step 4 Identify the main point of your informative project.	619
Step 5 Support main point.	620
Step 6 Organize your informative project.	622
Step 7 Get feedback.	623
Step 8 Revise.	623
Step 9 Refine your voice.	624
Step 10 Edit.	625
Writing Projects	625

PART 5 Essential Reading and Research Skills

Chapter 19 Reading for Understanding and Engagement

Understanding Academic Writing as Conversation	628
A Strategy for Reading Academic Texts	632
Skim to Get the Big Picture	633
Read the Abstract, Preface, or Introduction	633
Place the Text in Rhetorical Context	634
Identify Key Terms	637
Use the Structure	639
Review the Bibliography	640
Take Notes	641
Reading Critically	642
Determine the Meaning	645
Evaluate the Nature and Credibility of the Source	645
Consider the Rhetorical Context	645
Summarizing and Paraphrasing	648
Synthesizing	652
Keep Larger Goals in Mind	653
Identify a Main Point	654
Use Only the Source Material You Need	654

Chapter 20 Writing Summary-Response Essays

Occasions for Summary-Response Writing	660
Understanding Summary-Response	662

Using the Ten Core Concepts to Write a Summary-Response Essay 667

Step 1 Identify a topic. 667

Step 2 Place your topic in rhetorical context. 668

Step 3 Select a medium. 669

Step 4 Identify the main point of your summary-response project. 669

Step 5 Support main point. 670

Step 6 Organize your summary-response project. 672

Step 7 Get feedback. 673

Step 8 Revise. 673

Step 9 Refine your voice. 674

Step 10 Edit. 674

Writing Projects 675

Chapter 21 Finding Source Material

Understanding Research 677

Determining What You Need 679

Consider Your Purpose and Audience 679

Generate Questions You Might Need to Address 680

Identify Possible Sources to Answer Your Questions 680

Understanding Sources 682

Books 684

Scholarly Journals 685

Reference Materials 686

Magazines and Newspapers 688

Websites 689

Social Media 690

Locating the Right Sources 691

Library Websites 691

Databases 691

Search Engines 692

Developing a Search Strategy 694

Do a General Search for Materials on Your Topic 696

Narrow Your Search to Explore Specific Issues and Questions 700

Do a Targeted Search to Fill Gaps in Your Source Information
and Find Alternative Viewpoints 705

Chapter 22 Evaluating Sources

Determining Whether a Source Is Trustworthy 707

Credibility 709

Reliability 711

Understanding Bias 712

Evaluating Source Material for Your Rhetorical Purposes 716

Distance Learning During the Pandemic Has Flaws, but Online Degrees Are Legitimate,

by Rainesford Stauffer, *Teen Vogue* 717

What Students Are Doing Is Remote Learning, Not Online Learning. There's a Difference.

by Ryan Craig, EdSurge.com 719

Is Remote Learning Better? by Frederick M. Hess, *National Review* 721

Is the Source Credible? 723

Is the Source Reliable? 724

What Is the Bias of the Source? 725

How Useful Is the Source? 728

Chapter 23 Using Source Material

Quoting from Sources 731

Quote Only What You Need and When Necessary 731

Reproduce the Original Text Accurately 733

Be Concise 733

Make It Fit 735

Additional Guidelines for Quoting from Sources 738

Punctuate Complete Quotations Correctly 738

Insert Quoted Phrases When You Don't Need an
Entire Statement 739

Use Ellipses to Indicate Missing Words from a Quotation 739

Use Brackets to Indicate a Modified Quotation 740

Avoiding Plagiarism 740

Chapter 24 Preparing an Annotated Bibliography

Features of an Annotated Bibliography 746

Creating a Bibliographic Citation 747

Writing Annotations 748

Using the Ten Core Concepts to Write an Annotated Bibliography 752

- Step 1** Identify a topic. 752
- Step 2** Consider the rhetorical context. 753
- Step 3** Select a medium. 754
- Step 4** Identify the main point of your annotated bibliography. 755
- Step 5** Support your main point. 757
- Step 6** Organize your annotated bibliography. 758
- Step 7** Get feedback. 758
- Step 8** Revise. 759
- Step 9** Refine your voice. 760
- Step 10** Edit. 760

Sample Student Bibliography 761

*Political Polarization and Free Speech on College Campuses in the United States:
An Annotated Bibliography*

Chapter 25 Citing Sources Using MLA Style

Two Main Components in MLA Style 767

Creating In-Text Citations in MLA Style 768

Creating a Works Cited List in MLA Style 773

Books 776

Periodicals 780

Other Sources 783

Sample MLA-Style Research Paper 788

*An Analysis of the Research on the Prevalence and Perpetuation of Emotional Abuse in
Relationships*, by Olivia Thomas 789

Chapter 26 Citing Sources Using APA Style

Two Main Components in APA Style 801

Creating In-Text Citations Using APA Style 802

Creating a References List in APA Style 807

Books 809

Periodicals 812

Other Sources 815

Sample APA-Style Research Paper 818

U.S. Foreign Policy on Religious Persecution, by Nazafat Jarrin 819

PART 6 Design and Style for 21st Century Writers

Chapter 27 Designing Documents

Understanding Document Design as a Rhetorical Tool 830

Principles of Document Design 833

Contrast 834

Repetition 835

Alignment 837

Proximity 838

Working with Visual Elements 842

Working with Tables, Graphs, and Charts 842

Working with Images 847

Designing Documents: Two Sample Projects 849

Print Documents 849

Designing a Website 851

Chapter 28 Creating Presentations

Understanding Presentations as Rhetorical Events 855

Delivering Presentations 857

Guidelines for Using Presentation Software 865

Keeping Your Purpose in Mind 865

Designing Slides That Inform and Engage 866

A Sample Presentation 871

Chapter 29 Composing with Style

Developing an Academic Writing Style 879

Learning to Write Like a Scholar 880

Principles of Academic Inquiry 881

Writing Paragraphs 885

Writing Well-Developed Paragraphs 886

Achieving Coherence 887

Achieving Cohesion 889

Framing 890

XX Writing Ten Core Concepts

xxii Writing: Ten Core Concepts

Copyright 2022 Cengage Learning. All Rights Reserved. May not be copied, scanned, or duplicated, in whole or in part. WCN 02-200-322

Preface

Writing is a way to understand and participate in the world around us. It is a vehicle for learning—a way to make sense of our experiences and convey what we learn to others. Writing is a powerful means of individual expression and social interaction that has the capacity to change us. As the National Commission on Writing in America's Schools and Colleges put it, "At its best, writing has helped transform the world."

Composition teachers know all this, of course. They understand the power of writing, and they know that writing well is necessary for students to succeed in college and beyond. But instructors also know that a one-semester course is never quite enough to help students develop the sophisticated skills they will need to write effectively in their college classes and in their lives outside school. Research indicates that students need their entire college careers to develop those skills. First-year writing courses can lay the foundation for that process.

To make the most of the composition course, *Writing: Ten Core Concepts* focuses on the most important skills and knowledge that students must develop to be able to write the kind of sophisticated prose expected in college. It teaches the foundational lessons that students need to develop their competence as writers.

A Focus on Important Aspects of Writing

Research indicates that most college students tend to have difficulty with a few crucial aspects of writing:

- addressing an audience effectively
- focusing on a main idea and developing it sufficiently
- organizing texts appropriately
- adopting an appropriate register or "voice" in writing
- supporting assertions or arguments
- identifying and using appropriate sources
- revising effectively
- applying the conventions of academic writing

For the most part, these difficulties apply across disciplines and forms of writing. Significantly, research reveals that most of these problems arise from three main sources:

- students' lack of understanding of the rhetorical nature of writing
- students' inexperience with different rhetorical tasks across the college curriculum
- students' misunderstanding of how to manage the process of writing

In other words, these problems arise from a basic misunderstanding of the rhetorical and social nature of writing and inexperience with managing the writing process *in the context of varied rhetorical tasks*, especially the kind of writing tasks typical of academic work in college.

Consequently, *Writing: Ten Core Concepts* rests on three central ideas about writing:

- *Writing is a rhetorical act.* Writing is fundamentally an interaction between a writer and a reader within a specific social context. In this sense, writing is always a social activity, and effective writing connects writers and readers in complex and powerful ways.
- *Writing is a way to participate in the conversations that shape our lives.* Through writing, writers and their readers collaborate in knowledge-making and share information and opinions about issues that matter to them. Writing enables us to take part in the many ongoing conversations about important matters that affect how we live and how we understand ourselves and the world we inhabit. In the most basic sense, writing is a way to *construct* the world by participating in these complex conversations.
- *Writing is a means of inquiry.* Writing is an intellectual activity that can lead to a deeper understanding of ideas, experiences, and information. It is a means of understanding ourselves and the world we share. Writing can engage students in careful, critical thinking about themselves and the world around them. Writing is a unique and powerful vehicle for learning.

These ideas inform both the content and structure of *Writing: Ten Core Concepts*. As students are guided through various writing tasks and learn to manage the process of writing efficiently, they also gain a fuller understanding of the nature of writing as rhetoric, conversation, and inquiry. This book will help composition instructors meet a central challenge in working with student writers: helping students develop a sophisticated understanding of writing and gain experience as writers acting on that understanding.

Writing: Ten Core Concepts emphasizes what is essential in writing at the college level and guides students as they apply that knowledge to various writing tasks. It trains students to think rhetorically and helps them manage the fundamental characteristics of effective academic writing. In this regard, the Ten Core Concepts serve as both a framework for understanding writing and a practical, step-by-step guide for negotiating the demands of academic writing tasks.

Ten Core Concepts

The Ten Core Concepts distinguish this textbook from other writing guides. Most composition textbooks try to cover every conceivable aspect of writing in college and beyond, presenting far more material than students could ever grasp and retain in a single semester. That approach ultimately waters down the most important lessons that student writers must learn. *Writing: Ten Core Concepts* is different. It emphasizes what students must really learn to become effective writers.

These Core Concepts are not basic skills, nor are they procedures for completing specific kinds of writing tasks. Rather, they are fundamental insights into the nature of writing that students must enact as they complete varied writing tasks. These Core Concepts boil down what has been learned through research and practice into key ideas about what writing is and how effective writing works. For example, Core Concept 4—“a writer must have something to say”—emphasizes

the need for a piece of writing to convey a clear main point or idea. Studies indicate that college writing instructors identify the lack of a clear main idea as one of the most common weaknesses in student writing. This concept helps students understand why effective writing in most genres is characterized by a focus on a main idea; it also helps them understand how the different expectations in various academic disciplines can shape a writer's main idea and how that main idea is presented and developed in specific kinds of texts. Most importantly, the concept guides students through a process that enables them to identify, refine, and articulate the main idea of any writing project they are working on. In this way, the Core Concepts can deepen students' understanding of key insights about writing at the same time that students practice applying those insights in their own writing.

The Ten Core Concepts are not prescriptive. They are not step-by-step instructions for writing in specific genres. Instead, they are fundamental but flexible guidelines for writing; they serve as a set of heuristics that students can apply to *any* writing task. *Writing: Ten Core Concepts* is informed by the basic idea that practice is essential in developing writing competence. In a sense, this idea is the 11th Core Concept. Only through sustained, guided practice in writing different kinds of texts for various rhetorical situations can students develop the understanding and ability to write effectively for different purposes. Accordingly, *Writing: Ten Core Concepts* relies, in part, on the repetition of the Ten Core Concepts to give students the practice they need to make these Concepts part of their repertoire as writers.

The Structure of *Writing: Ten Core Concepts*

Writing: Ten Core Concepts is organized into six parts. Part 1 introduces students to the Core Concepts. Parts 2, 3, and 4 guide students through the most common forms of three main categories of writing: analysis, argument, and narrative. The focus in these three sections is on helping students understand the uses of various genres *within rhetorical contexts*. Through contemporary examples and engaging exercises, students learn how various forms of writing enable them to address specific audiences and effectively accomplish various rhetorical purposes; moreover, these chapters give students sustained practice in applying the Ten Core Concepts to different kinds of writing and rhetorical situations. Part 5 addresses critical reading and research skills. Finally, Part 6 helps students design documents, create presentations, and review and apply conventions of writing. A brief description of each of these main sections follows:

Part 1: A Guide to Writing Effectively. The four chapters in this section introduce students to the essential insights into writing that they must acquire if they are to be able to apply their writing skills effectively in different contexts. In this section, students explore the fundamental ideas about writing described previously: writing as rhetoric, as conversation, and as inquiry. Most important, they learn and practice the Ten Core Concepts that form the heart of this textbook. Chapter 2 explains these concepts, using examples to illustrate the lessons as well as exercises to help students understand how to apply the concepts in their own writing. Chapter 3 is an interactive, visual guide students can use to apply the Ten Core Concepts to any piece of writing. Chapter 4 presents a case study of a first-year student writer as she applies the Ten Core Concepts to complete a writing assignment.

Part 2: Writing to Analyze. The six chapters in Part 2 help students acquire competence in the most common forms of analytical writing in college. Chapter 5 introduces important features of analysis. Each of the other chapters explores the purposes and features of a different form of analytical writing and, using the Ten Core Concepts, guides students through an analytical writing project. The chapters also include practice in some of the key intellectual tasks associated with analysis, such as using a theoretical framework, that often challenge students.

Part 3: Writing to Persuade. In this section, students gain an understanding of the principles of effective argumentative writing, and they work through writing projects representing three main kinds of argument. Using the Ten Core Concepts as a guide for their writing, students explore the nature and purposes of argument in various contexts and practice applying the essential elements of argumentation for different rhetorical purposes.

Part 4: Writing to Narrate and Inform. The chapters in this section help students learn how to write effective narratives for different rhetorical purposes and also appreciate the important uses of narrative in academic contexts. Like the chapters in Parts 2 and 3, the chapters in this section guide students in applying the Ten Core Concepts so that they produce effective narrative and informative writing that meets the needs of various rhetorical situations.

Part 5: Essential Reading and Research Skills. This section provides students with practical advice about working with source material, conducting research for their various writing projects, and documenting sources. Chapter 19 focuses on essential intellectual skills that are important to the work that students do throughout college, including reading academic and nonacademic texts as well as summarizing, paraphrasing, and synthesizing texts. Chapter 20 helps students learn to write effective summary-response essays, an increasingly common genre that requires the application of the critical skills of summary and synthesis. Chapters 21, 22, and 23 provide an up-to-date guide for finding, evaluating, and using source material in an interconnected world in which powerful digital tools provide access to an astonishing amount of information, the sheer volume and variety of which require sophisticated critical evaluation. Chapter 24 guides students in compiling an annotated bibliography, an important kind of academic text to which students apply the key lessons from the preceding five chapters in this section. Finally, Chapters 25 and 26 help students understand and apply the guidelines for citing sources recommended by the MLA and the APA.

Part 6: Design and Style for 21st Century Writers. The four chapters in this section address the traditional challenges of design and style in the context of powerful digital technologies and contemporary perspectives on language and culture. In Chapter 27, students learn key lessons about an increasingly important aspect of effective writing today: document design. Some of those lessons are applied directly in Chapter 28, which helps students learn to develop effective presentations. Chapter 29 guides students in developing an effective writing style, with specific attention to the stylistic conventions of academic writing, which often confuse students. Finally, Chapter 30 helps students craft effective, engaging prose and avoid errors that can weaken their writing. Rather than trying to reproduce a comprehensive handbook, this chapter focuses on the most common problems in student writing, including the formal errors that research shows are typical of college student writing.

Throughout *Writing: Ten Core Concepts* students encounter varied examples of effective writing in different genres and different media. They see how other writers, including student writers, meet the challenges of contemporary writing in college and beyond, and they are given an assortment of opportunities to practice what they learn, all the while using the Ten Core Concepts as their framework for writing.

Integrated Coverage of Digital Literacy Practices

Writing: Ten Core Concepts focuses on the contemporary student who lives in a technological, digitized, globalized age. To write well today requires students to manage many different rhetorical tasks using various technologies in different media, including constantly evolving social media that have become essential tools for communication. Rather than addressing “digital literacy” as a separate skill or topic, *Writing: Ten Core Concepts* incorporates important and emerging digital technologies and literacy practices into the advice and practice it provides students for all their writing tasks. Throughout this textbook, students encounter up-to-date examples and exercises that reflect various uses of communications technologies, and they receive advice for taking advantage of these technologies to meet the needs of the rhetorical situations within which they are writing.

More Student Reading Selections and a New Genre

- **New Readings with an Emphasis on Writing by Students:** Twenty-eight new full-length reading selections in this edition provide engaging models of important forms of writing. Twelve of these new readings are by student writers, and most chapters that include reading selections feature at least one essay by a student. Many of these student essays were written for first-year writing classes, and several were cited with awards for excellence. Together, the readings—by professional and student writers—represent a range of genres and address timely issues such as race relations, controversies surrounding trigger warnings and freedom of expression, environmental sustainability, and the impact of the COVID-19 pandemic on various aspects of contemporary life.
- **New Coverage of Literacy Narratives:** Chapter 17 helps students understand the uses of this increasingly popular genre and provides advice, based on the Ten Core Concepts, to guide students in developing their own in-depth and engaging literacy narratives.

New Chapters on Presentations and Important Academic Genres

- **Expanded Treatment of Summary-Response Writing.** Chapter 20 guides students through the process of creating essays in this increasingly important form, beginning with an exploration of occasions for summary-response writing, within and beyond college writing assignments, and culminating in the application of the Ten Core Concepts to a summary-response project.
- **New Coverage of Annotated Bibliographies.** Chapter 24 guides students in developing an annotated bibliography as an important tool for research and inquiry, focusing on writing accurate and effective annotations as well as creating correct bibliographic entries in MLA or APA style.
- **New Coverage of Presentations.** Chapter 28 provides in-depth advice for developing and delivering presentations, whether in real time or asynchronously, emphasizing the rhetorical character of presentations and their usefulness as a tool for inquiry.

Enhanced Coverage of Critical Reading Strategies

Chapter 19 features a new section focused on critical reading strategies for nonacademic texts. Students today must learn to navigate an enormous amount and variety of material that is available online, and they must do so in the context of political polarization and so-called ideological “echo chambers” created by online media outlets and social media platforms. This chapter helps students develop strategies for distinguishing between fact and opinion and making appropriate inferences from reading material, whether academic or nonacademic.

Updated APA Documentation Guidelines and Student Essays

- Chapter 25, Citing Sources Using MLA Style, and Chapter 26, Citing Sources Using APA Style, each include new student research essays demonstrating proper source citation.
- Chapter 26 has been extensively revised to reflect the 2020 APA guidelines for documenting sources, including many new model citations and new digital examples to help students cite sources accurately.

MindTap® English for Yagelski's *Writing: Ten Core Concepts*, 3rd Edition

MindTap® English engages your students to become better thinkers, communicators, and writers by blending your course materials with content that supports every aspect of the writing process. Interactive activities on grammar and mechanics promote application in student writing, and an easy-to-use paper management system allows for electronic submission, grading, and peer review while tracking potential plagiarism. A vast database of scholarly sources supports the research process, and professional tutoring guides students from rough drafts to polished writing. Visual analytics track student progress and engagement with seamless integration into your campus learning management system that keeps all your course materials in one place.

MindTap® English now comes equipped with the diagnostic-guided JUST IN TIME PLUS learning module for foundational concepts and embedded course support. The module features 43 distinct units, each containing scaffolded video tutorials, instructional text content, and auto-graded activities designed to address each student's specific needs for practice and support to succeed in college-level composition courses. MindTap® English also includes 50 Readings, a curated selection of readings organized in ten themes: Fake News on Social Media, Media Bias, The Value of College, Social Justice, Cultural Appropriation, Place and Identity, Nature and the Environment, Gender Identity, Writing about Writing, and Public Discourse. Each reading is accompanied by discussion questions and a short auto-graded reading quiz.

Acknowledgments

Writing a textbook can be a daunting undertaking, but it is made less so by the inherently collaborative nature of the work. This book is not mine; rather, it is the result of the sustained efforts of many people, whose ideas, dedication, and hard work helped make *Writing: Ten Core Concepts* a reality. It is impossible to thank them enough.

I am extremely grateful to Lyn Uhl for originally identifying this project as an important one and providing the support necessary to realize the vision that informed this project from the beginning. I am grateful as well to all the professionals at Cengage who were part of this project over the years and especially to those who contributed to the development of this edition: Laura Ross, Kathy Sands-Boehmer, Rachel Kerns, Leslie Taggart, Kate MacLean, Matt Filimonov, and Nancy Tran. Special thanks to Kina Lara, whose tireless (and always good-humored) efforts on behalf of this textbook not only provided many opportunities for me to gain insights and influenced the development of this new edition but also helped energize my work on this project.

My thanks also to Vanessa Coloura for her terrific work on the MindTap version of the first edition of this book. Leslie Taggart deserves additional thanks for all her work in developing the brief version of this textbook as well as many of its online components.

I would like to express very special thanks to Stephanie Pelkowski Carpenter, the development editor for this new edition. Over nearly twenty-five years of writing college textbooks, I have worked with many excellent editors. None is more expert, careful, insightful, generous, and supportive than Steph. From the beginning of our work on this edition, she never failed to provide excellent advice and valuable suggestions, and she was instrumental in keeping the project on track, despite monumental obstacles, including the COVID-19 pandemic as well as unexpected surgeries and deaths—in addition to all the “normal” problems associated with the development of a textbook like this one. I cannot thank her enough for her guidance, diligence, understanding, patience, and expertise. I am genuinely blessed to have had the opportunity to work with her.

I am deeply grateful as well to Mary Joe Morgan, who served as research assistant for this edition and who provided valuable research support and advice, especially regarding the reading selections for this edition.

I gratefully acknowledge the important role of my terrific colleagues in the Program in Writing and Critical Inquiry at the State University of New York at Albany. Their expertise and dedication as teachers of writing have not only inspired me but also helped deepen my own understanding of effective writing pedagogy. Their influence has shaped this new edition in both subtle and profound ways. In particular, I would like to thank Ms. Jackie Amoroso, Dr. Joseph Creamer, Dr. Sarah Giragosian, Ms. Titcha Ho, Dr. Joseph Meyer, Dr. Marcie Newton, and Mr. Ryan Orr for helping me find the excellent student essays that appear in this edition, many of which were honored as winners in the WCI Essay Contest at SUNY-Albany. Special thanks to Dr. Marcie Newton, with whom I had the great pleasure of co-teaching a special section of the Seminar in

Writing and Critical Inquiry at SUNY-Albany in fall 2020, during the height of the COVID-19 pandemic. Marcie and our terrific students in that class taught me more than I could ever describe about writing and teaching, and those lessons have shaped this new edition. Special thanks as well to Mrs. Kimberly Smith, administrative assistant extraordinaire for the WCI Program, whose diligence, unfailing dependability, and intelligence make my life immeasurably easier; I am truly grateful for her constant support and good humor.

I am also deeply grateful to the students at SUNY-Albany who gave me permission to include their writing in this edition: Libra Dolce, Kayla Ferderigos, Thu Hoang, Nazafat Jarrin, Mehr Sharma, Olivia Thomas, and Caroline Veldhuizen. Their terrific work not only enriches this textbook but also strengthens my hope in our collective future. In particular, I wish to thank Chloe Charles, the author of the essay that appears in Chapter 4 (and Dr. Joseph Creamer's former student). As a student at SUNY-Albany, Chloe was hard-working, dedicated, and curious, and she was cheerfully willing to put in a great deal of time and effort so that her essay could be part of the second edition of this textbook. I am very proud to be able to include her essay in this new edition, and I am blessed to have had the chance to work with her and learn from her. Thanks, too, to Lily Paperman, a SUNY-Albany student and peer mentor in the Program in Writing and Critical Inquiry, and Harmony Taggart, both of whom contributed on very short notice to the Talking about This Reading feature of this textbook. I am honored to have the contributions of these wonderful students to this edition.

My thanks to Andy Fogle, of Bethlehem High School in Bethlehem, New York, who helped with the research for several chapters during the development of the first edition, and Tony Atkins, of the University of North Carolina at Greensboro, who not only provided invaluable insight about the treatment of technology throughout the book but also helped develop the chapter on document design for the second edition.

It should go without saying that my students over the years have been perhaps the most important influence on my work as a teacher and a writer. They have taught me so much of what I know about writing, and they have enriched my life and work. I am grateful to all of them for allowing me to be part of their learning and their lives. They truly do make this work worthwhile.

I am especially grateful to Carol Forman-Pemberton, who became my most trusted colleague and wonderful friend over the dozen or so years that we co-directed the Capital District Writing Project. I have learned from her more about writing and teaching than I could ever include in a single textbook, and her wisdom as a professional has guided my own work. I am truly fortunate to have her as a colleague and friend.

I would like to thank Tom Chester, Elizabeth Starr, Jeff Pashke-Johannes, and John Wieland of Ivy Tech for their gracious help in developing materials on annotated bibliographies and summary-response writing.

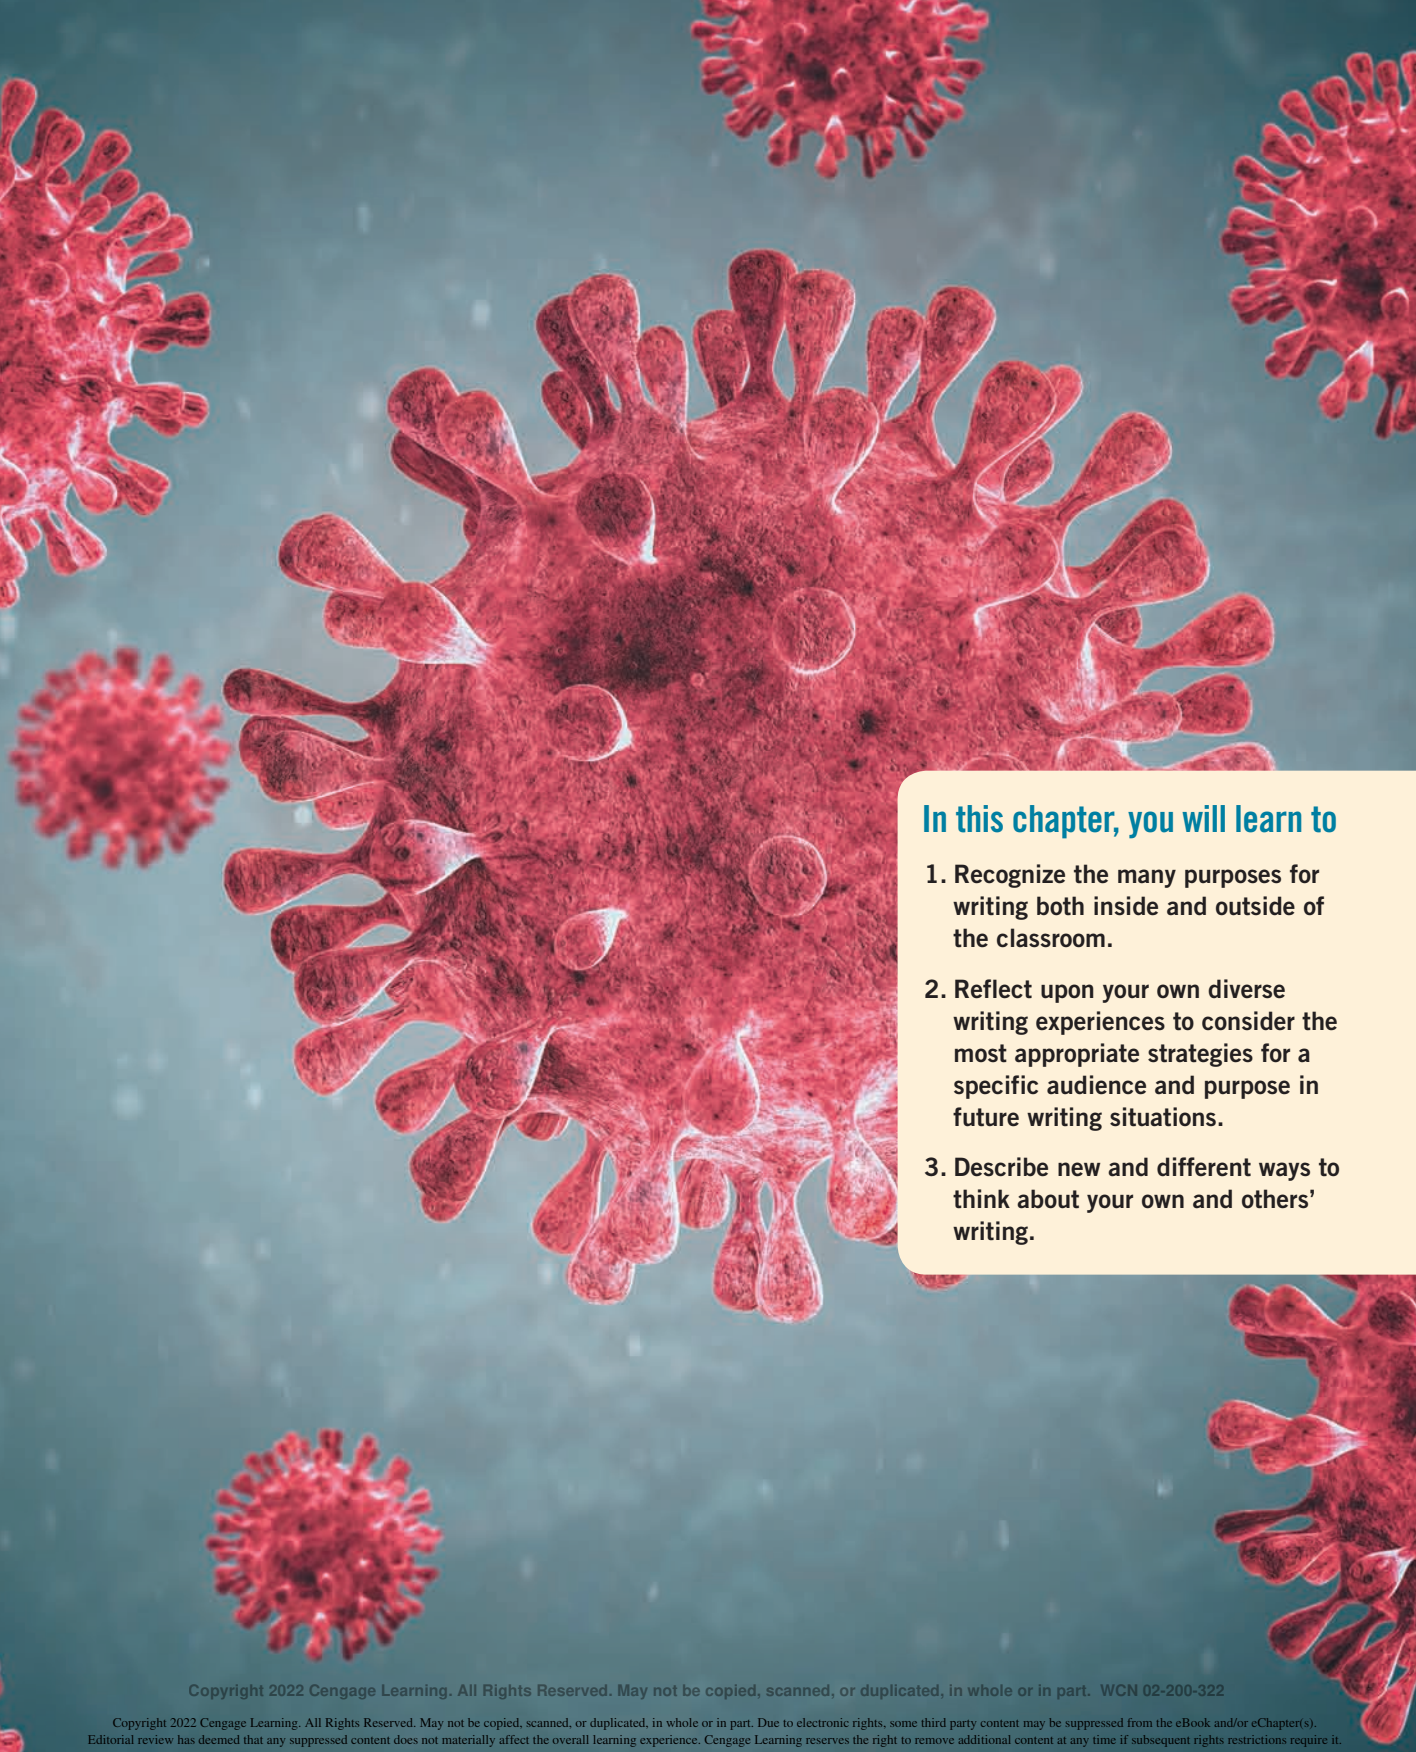

The many experts at Cengage who helped with the design, digital production, and marketing of this textbook also deserve a special thanks: Lizz Anderson and Matt Aliteri. I especially wish to acknowledge Erin Parkins, former marketing manager at Cengage, whose tireless work on behalf of this textbook helped make the first edition a success.

I greatly benefited from the advice of many insightful instructors who provided thoughtful reviews and other kinds of feedback that helped shape this edition. My sincerest thanks to all the

following instructors: Eugenia Badger, Indiana University; Rena Dossett, Ball State University; Kimberly Russell, Texas Women's University; Brianne Sardoni, Dallas College; Elizabeth Starr, Ivy Tech Community College; and Danielle Williams, Baylor University.

Finally, I am deeply grateful for the support of my family, which was especially important during the very challenging year (2020) when most of the work on this project was completed. In particular, I wish to express my love and gratitude to my mother, Joan Yagelski, and my siblings—Mary Cooper, Gary Yagelski, and Dianne Yagelski—whose love and pride in my work help sustain me. In early March of 2020, as the COVID-19 pandemic was beginning to rage in the United States, we lost Ronald Yagelski, my father, to a longstanding illness. His passing made a difficult year even harder to bear. I have dedicated this edition to his memory. I am blessed to have two families, one by marriage, and I wish to express my gratitude to my mother-in-law, Charlotte Hafich, who has always offered unconditional love and support as if I were her own son. And my own sons, Adam and Aaron, are an integral part of how I see the world; they enrich my life in profound ways that inevitably manifest in my writing, and it brings me such great joy to continue to be part of their lives. Most of all, Cheryl, my wife of 39 years and the love of my life, has never wavered in her love and support for me, no matter how difficult the times might become. She has been part of my professional journey from the beginning, and in that regard this textbook is as much hers as it is mine. I am so deeply blessed to be able to share this work—and my life—with her. She always provides safe harbor.

Robert P. Yagelski

In this chapter, you will learn to

1. Recognize the many purposes for writing both inside and outside of the classroom.
2. Reflect upon your own diverse writing experiences to consider the most appropriate strategies for a specific audience and purpose in future writing situations.
3. Describe new and different ways to think about your own and others' writing.

Why We Write

1

WRITING IS A POWERFUL MEANS of communicating ideas and information across time and space. It enables us to participate in conversations and events that shape our lives and helps us make sense of the world. In fact, writing can change the world. Consider these examples:

- *The Art of War*, believed to have been written in the 6th century B.C.E. by Chinese military strategist Sun Tzu, is still widely read by military leaders, politicians, and business leaders.
- Charles Darwin's *On the Origin of Species*, published in 1859, revolutionized scientific thinking about life on earth and laid the foundation for the modern field of biology.
- Betty Friedan's *The Feminine Mystique*, published in 1963, is considered by many to have begun the women's rights movement that has reshaped American social, cultural, political, and economic life in the past half century.
- Messages posted on Facebook and Twitter during the so-called "Arab Spring" in 2011 helped provoke protests in Egypt and Tunisia that led to new governments in those nations.
- The writings of Swedish high school student Greta Thunberg on social media and elsewhere sparked a worldwide movement in 2018 to mobilize young people to pressure their governments for action on global climate change.
- The technical reports written and shared by thousands of scientists around the world during the 2020 COVID-19 pandemic helped medical professionals understand the disease and save countless lives.

These are only the most dramatic examples of the capacity of writing to transform our world.

For many college students, however, writing is mostly a requirement. Most students don't seem to mind writing, but few would choose to write the kinds of essays and reports usually assigned in school. Students consider such assignments necessary, but they don't necessarily enjoy them. For many students, writing in school can be tedious and dull. Maybe you feel the same way.

Yet students write all the time, for all kinds of reasons:

- They send text messages, post to Instagram and Facebook, and tweet to stay in touch with friends, share information, let others know what they think, and keep informed about events or issues that matter to them.
- They respond to their favorite blogs or maintain their own blogs.
- They keep journals or diaries.
- They circulate petitions to support causes on their campus or in their town.

- They rap and participate in poetry slams to express their feelings about important issues in their lives.
- They write essays to gain admission to college or graduate school.
- They create resumes to apply for jobs.

Whether they realize it or not, students regularly use writing to live their lives, to accomplish tasks that they have to do or choose to do, and to participate in their communities.

If these kinds of writing don't seem as important as, say, a book like *The Wealth of Nations* or *The Feminine Mystique*, they should, for if a book can be said to have changed the world, the same is true of tweets, texts, blogs, essays, and letters written by ordinary people, including students. A job application letter can change your life. A petition can change a policy on your campus that affects hundreds or thousands of students (see Sidebar: “How a Student Changed a College Policy on Free Speech”). An essay can inspire your classmates, change their minds about an issue, or move them to take action. A tweet or Instagram post can help spark a social or political movement. In 2013 a young woman from California named Alicia Garza posted a message on her Facebook page about the death of a young black man in Florida named Trayvon Martin. Her message became the hashtag #BlackLivesMatter, which in turn became an important national movement that helped shape discussions about race relations in the United States and even influenced the presidential elections in 2016 and 2020. Sometimes such ordinary kinds of writing can result in extraordinary change even on the international level: in Egypt, in February, 2011, tweets, email messages, texts, blog posts, and Facebook entries from ordinary citizens played a key role in the protest movement that led to the resignation of Egypt's president, who had ruled that nation for more than three decades. In other words, writing by ordinary citizens helped change the government of that country—a change that has touched the life of every Egyptian and many people outside Egypt.

SIDEBAR

HOW A STUDENT CHANGED A COLLEGE POLICY ON FREE SPEECH

In September 2013, a student named Vincenzo Sinapi-Riddle at Citrus College in Glendora, California was soliciting signatures for a petition regarding the surveillance of American citizens by the U.S. government as part of its so-called “war on terror.” Sinapi-Riddle was a member of a national student organization called Young Americans for Liberty, whose mission, according to the group’s website, is “to identify, educate, train, and mobilize young people” who are committed to its Libertarian political views. As the following account reveals, Sinapi-Riddle was standing outside the student center on the Citrus College campus talking about his petition with another student when an administrator threatened to remove him from campus for violating the college’s policy on free speech. Sinapi-Riddle was told that he was standing outside the designated area for protest and, therefore, could not continue advocating for his petition. With the help of an organization called the Foundation for Individual Rights in Education, or FIRE, Sinapi-Riddle filed a lawsuit against Citrus College, arguing that the college’s free speech policy violated students’ constitutional right to free speech. He won his suit, and Citrus College revised its policy. As Sinapi-Riddle wrote on his blog, we “launched our initiative to raise awareness about warrantless government spying with great success. In the end we gathered over 300 signatures for our petition asking student government to denounce NSA spying, but in the process of protesting one egregious violation of our rights we stumbled upon another.”

This case provides a compelling example of how students can use writing to effect change. Sinapi-Riddle and his fellow students in Young Americans for Liberty used writing to raise awareness about an issue (government surveillance of citizens) that concerned them, but writing was also an essential tool in the lawsuit against Citrus College. In addition to the various legal documents required in the case, Sinapi-Riddle used blog posts, social media, and news reports to support his position and take action against a policy that he believed was wrong.

Citrus College Stand Up for Speech Lawsuit

On September 17, 2013—Constitution Day—Citrus College (Glendora, California) student Vincenzo Sinapi-Riddle was threatened with removal from campus by an administrator for asking a fellow student to sign a petition protesting NSA surveillance of American citizens. His crime? Sinapi-Riddle was petitioning outside of the college’s tiny “free speech area.” Sinapi-Riddle is president of the Citrus College chapter of Young Americans for Liberty and is passionate about his political beliefs, but he has curtailed his expressive conduct on campus in light of this incident and Citrus College’s speech-repressive policies. . . .

In addition to challenging Citrus College’s “free speech area,” which comprises just 1.37% of campus, Sinapi-Riddle is challenging two other policies: (1) the college’s

(Continued)

“verbal harassment policy,” which prohibits a wide range of speech protected by the First Amendment, including “inappropriate or offensive remarks”; and (2) the college’s elaborate permitting requirements for student group speech, which require student groups wishing to express themselves on campus to wait two weeks and obtain the permission of four separate college entities prior to doing so.

College That Suppressed Anti-NSA Petition Settles Lawsuit

LOS ANGELES, December 3, 2014—Today, Citrus College in California agreed to settle a student’s free speech lawsuit for \$110,000, marking the Foundation for Individual Rights in Education’s (FIRE’s) second victory for the First Amendment in 24 hours.

Student Vincenzo Sinapi-Riddle filed the federal lawsuit in July as part of FIRE’s Stand Up For Speech Litigation Project. Sinapi-Riddle was threatened with removal from campus for soliciting signatures for a petition against domestic surveillance by the National Security Agency (NSA) outside of Citrus’s tiny “free speech area.”

In addition to the monetary settlement for Sinapi-Riddle’s damages and attorneys’ fees, Citrus has revised numerous policies, agreed not to impede free expression in all open areas of campus, and adopted a definition of harassment that complies with the First Amendment.

“Citrus College agreed to eliminate its restrictive ‘free speech zone’ in the face of a FIRE lawsuit back in 2003, but later reinstated its speech quarantine when it thought no one was watching,” said FIRE President Greg Lukianoff. “But FIRE was watching, and we’ll continue to do so. If the speech codes come back again, so will we.”

To hold Citrus to today’s settlement, the U.S. District Court for the Central District of California will retain jurisdiction over the case for one year, allowing Sinapi-Riddle to enforce the agreement without filing a new lawsuit.

The incident leading to the lawsuit took place on September 17, 2013—Constitution Day. Sinapi-Riddle had gone to Citrus’s designated free speech area to collect signatures for a petition urging the college’s student government to condemn the NSA’s surveillance program. Then, as Sinapi-Riddle took a break to go to the student center, he began a discussion about the petition with another student. An administrator put a stop to the conversation, claiming that a political discussion could not take place outside of the free speech area and threatening to eject Sinapi-Riddle from campus for violating the policy.

In addition to restricting student free speech to an area comprising just 1.37 percent of the campus, Citrus maintained a lengthy approval process for registered student organizations seeking to engage in expressive activity. Sinapi-Riddle, president of Young Americans for Liberty at Citrus, had given up on organizing events because of a burdensome process that included review by four different college entities and a requirement of 14 days’ advance notice. The process was so complex that the Student Handbook had to include a flowchart illustrating it.

The lawsuit against Citrus College was one of four suits filed on July 1, marking the public launch of FIRE’s Stand Up For Speech Litigation Project. Attorneys Robert

Corn-Revere, Ronald London, and Lisa Zycherman of the law firm Davis Wright Tremaine represented Sinapi-Riddle. FIRE has coordinated seven lawsuits to date, with more on the way. Citrus is the third that has been settled in favor of students' free speech rights; each of the remaining four suits is ongoing.

"I feel that free speech and the ability to express oneself freely is a very important right for all students," said Sinapi-Riddle. "I'm very grateful for FIRE's help in making sure that limitations on free speech are a thing of the past at Citrus College."

Second Victory in 24 Hours: College That Suppressed Anti-NSA Petition Settles Lawsuit. *Foundation for Individual Rights in Education*, 3 Dec. 2014, www.thefire.org/second-victory-24-hours-college-suppressed-anti-nsa-petition-settles-lawsuit/

Questions for Discussion

1. Identify the various ways in which writing was used in this case (e.g., petitions, social media). What role did each of these kinds of writing play? (You can visit the website of the Foundation for Individual Rights in Education for more information about the case. Also, search the web for additional news reports.)
2. What do you think the uses of writing in this case reveal about writing as a tool for political action? Do you think Sinapi-Riddle and the other students involved in this case could have accomplished their goals without using writing as they did? Why or why not? What advantages (or disadvantages) do you see in the way students used writing in this situation? What alternatives did the students have?
3. Write a brief essay about a time when you used writing to voice a concern, lodge a complaint, or try to change something. Then, with a group of classmates, share your essays. What similarities and differences do you see in the writing that is described in these essays? What conclusions might you draw from these essays about the role of writing in your lives?

As a college student you will probably do most of your writing for your classes. This textbook will help you learn to manage college writing assignments effectively. But writing well can also help you live your life in ways that extend far beyond the classroom. So in this chapter—and throughout this textbook—we will examine some of the many different situations in which you might be asked to write.

Understanding Writing

This textbook has another important goal: to help you understand what writing is. One reason that so many people struggle with writing is that they don't sufficiently understand the nature of writing. They believe writing is a matter of following arcane rules that are often difficult to

remember or grasp. They think writing is a result of inspiration and creativity, which they believe they lack, or they assume they can't write well because they don't have a large enough vocabulary. These beliefs are based on common misconceptions that can lead to frustration and prevent students from becoming successful writers. Yes, writing well *does* require knowing rules, and having a large vocabulary doesn't hurt. But writing is more than rules or inspiration or vocabulary. Writing should be understood in four important ways:

- Writing is a powerful means of expression and communication.
- Writing is a way to participate in ongoing conversations about ideas, events, and issues that matter in our lives.
- Writing is a unique form of thinking that helps us learn.
- Writing is a way to understand ourselves and the world around us.

For students who come to understand writing in these four ways, learning to write effectively can be a much more satisfying and successful process. *Abandoning common misconceptions and appreciating the complexity, power, and joy of writing are the first steps to learning to write well and feeling confident about writing.* This textbook will introduce you to the most important ideas—the Core Concepts—that you need to know in order to write well. It is also designed to give you practice in the most common forms of writing for a variety of audiences and purposes—in college, in your community, in the workplace, and in your life in general.

FOCUS

THINK DIFFERENTLY ABOUT YOUR WRITING

What were the most important pieces of writing you have ever done in your life? Under what circumstances did you write them? What form did they take (e.g., were they conventional essays, letters, emails, Prezi presentations?) Why were they important? In what ways did they affect your life? What do these pieces of writing suggest about the role of writing in your life? Jot down brief answers to these questions and consider what your answers reveal about the role of writing in your life. You might do many kinds of important writing without really being aware of them.

Writing in College

Let's face it, students have to write well if they expect to do well in school. Whether it's a lab report in a biology class, a research paper in a sociology course, a proposal in a business class, or a literary analysis essay in an English course, writing effectively means better learning and better grades. In this regard, **writing in college serves three main purposes:**

- It is a way for you to demonstrate what you know.
- It helps you learn.
- It enables you to join important conversations about the subjects you are studying.

Write to Demonstrate What You Know

Writing is a way for you to show your instructors what you have learned. An essay exam in history, for example, helps your instructor decide whether you have understood a particular concept (say, manifest destiny) or learned about historical events that are part of the course syllabus. Similarly, your economics professor might assign an essay requiring you to analyze a market trend, such as the use of social media for product placement, to determine whether you and your classmates have grasped certain economic principles. For this reason, college students are asked to produce many different kinds of assignments: reports, research papers, analytical essays, arguments, synopses, creative writing (such as poems), personal narratives, reflective essays, multimedia presentations, and more.

FOCUS THINK DIFFERENTLY ABOUT YOUR WRITING

Think about a recent essay exam or assignment that you wrote for one of your classes. First, describe the writing you did. What was the assignment? What exactly did you write? What do you think was most important about that piece of writing? What did it reveal about what you know about the subject? What do you think it suggests about you as a writer?

When writing essay exams, reports, or research papers for your classes, keep in mind that you are writing to demonstrate what you have learned. Have confidence that your writing reflects what you know. And remember that your writing can also help you identify what you still need to learn.

Write to Learn

Writing an essay exam or a research paper isn't just a way to demonstrate learning; it is also a means of learning in itself. As you will see in the next chapter, writing is a form of intellectual inquiry, and it is essential to student learning, no matter the subject. To write an ethnographic analysis of a culture for an anthropology class, for example, is to learn not only about that culture but also about ethnography as a way of understanding how we live together. It's true that students can learn a great deal by reading, but writing engages the mind in ways that reading does not. Reading about ethnography can help students understand what ethnography is; writing an ethnographic report about a culture enables students to *apply* that understanding, which can lead to a deeper learning of the subject matter.

This idea that writing is learning can be easy to forget when you are trying to meet deadlines and follow detailed guidelines for an assignment. But if you approach your writing assignments as a way to learn about your subject matter, the process of writing can be more satisfying and can lead to more effective essays. And remember that every writing assignment is also an opportunity to learn about writing itself. The more you write, the better you understand the power and joy of writing and the better able you will be to meet the challenges of writing.

One last point about the power of writing as a way to learn: the more you write, especially when you write as a way to explore your subject matter, the more you learn about *yourself* as a writer and thinker. Knowing your strengths as a writer enables you to take advantage of them; knowing your weaknesses is essential if you are to improve your writing. That understanding will help you become a better writer.

FOCUS THINK DIFFERENTLY ABOUT YOUR WRITING

Describe a writing assignment you did for a college or high school class that was especially challenging for you. Explain why you found the assignment challenging. Now consider what you learned by doing the assignment. What did you learn about the subject matter? What did you learn about writing? Did anything surprise you about doing that assignment? What surprises you now as you look back on it? What do you think you learned about yourself as a writer?

If you approach writing assignments as opportunities to discover new information, explore new ideas, and enhance your understanding of your subject, writing can be more satisfying, and you might find you learned more than you think you learned. You might also find that your writing improves.

Write to Join Academic Conversations

Writing is the primary way that experts in all academic disciplines do their work and share their ideas:

- Mathematics professors may work mostly with numbers and formulas, but they also write articles about current problems in mathematics that other mathematicians read.
- Historians study ancient artifacts to help them understand past events, and they share their understanding in the articles and books they write for other historians and for the general public.
- Scientists might spend long hours in their labs, but they test each other's theories by sharing and debating the results of their experiments in papers they write for scientific journals and professional meetings.
- Scholars in all fields regularly share information and debate ideas by posting messages to professional online discussion forums and blogs and even debating them on social media platforms like Twitter.

In all these cases, writing is the main vehicle by which scholars discuss the central questions in their fields. They cannot do their work without it.

Writing for a college class, whether it be psychology, business, or chemistry, is a way for students to enter these same conversations about the ideas, information, and ways of thinking that define academic fields. Part of what students learn when they write in college, then, is how to use writing as a tool for discovering and sharing knowledge in various academic disciplines. In this sense, writing an assignment for a college class is a process of learning to write like a scholar in that field. When you are asked to write a research paper in a psychology course or a lab report

in a biochemistry class, you are learning to do the kind of intellectual work that psychologists or biochemists do. You are learning to see the world as they do. You are learning to participate in the conversations about important topics in those academic fields. And by doing so you are using writing to expand and deepen your knowledge about those fields as well as about the world in general.

FOCUS THINK DIFFERENTLY ABOUT YOUR WRITING

Take two or more assignments you wrote for different college (or high school) classes. For example, take a literary essay you wrote for an English class, a report you did for a biology class, and a research paper for a history class. List the similarities and differences that you notice among them. Look at the writing style you used in each paper, the structure of each paper, and the language you used. What stands out about each paper? In what ways are the papers different or similar? How can you explain the similarities and differences you see in these papers? What do you think the similarities and differences among these papers suggest about the writing you are asked to do in college?

Of course, writing in college also serves another purpose: it gives students genuine practice that helps them become better writers, which can benefit them in their lives outside of school as well.

EXERCISE 1A

Read the three excerpts included here. Each excerpt is taken from an article or book in a different academic subject. The first is from a marketing textbook, the second from an education journal, and the third from a scientific journal. After reading the excerpts, compare them by addressing these questions:

- What do you notice about the writing in these three pieces?
- What do you think are the purposes of the writing in each case?
- What similarities or differences do you see in the writing style, language, and structure of these excerpts? What might these similarities and/or differences suggest about writing in different disciplines?
- What does your comparison of these three excerpts suggest about academic writing? What does it suggest about writing in general?

1. What Is Marketing?

What does the term *marketing* mean to you? Many people think it means the same thing as personal selling. Others think marketing is the same as personal selling and advertising. Still others believe marketing has something to do with making products available in stores, arranging displays, and maintaining inventories of products for future sales. Actually, marketing includes all of these activities and more.

(Continued)

Marketing has two facets. First, it is a philosophy, an attitude, a perspective, or a management orientation that stresses customer satisfaction. Second, marketing is activities and processes used to implement this philosophy.

The American Marketing Association's definition of marketing focuses on the second facet. Marketing is the activity, set of institutions, and processes for creating, communicating, delivering, and exchanging offerings that have value for customers, clients, partners, and society at large.

Marketing involves more than just activities performed by a group of people in a defined area or department. In the often-quoted works of David Packard, cofounder of Hewlett-Packard, "Marketing is too important to be left only to the marketing department." Marketing entails processes that focus on delivering value and benefits to customers, not just selling goods, services, and/or ideas. It uses communication, distribution, and pricing strategies to provide customers and their stakeholders with the goods, services, ideas, values, and benefits they desire when and where they want them. It involves building long-term, mutually rewarding relationships when these benefit all parties concerned. Marketing also entails an understanding that organizations have many connected stakeholder "partners," including employees, suppliers, stockholders, distributors, and society at large.

2. Brain-Based Teaching Strategies for Improving Students' Memory, Learning, and Test-Taking Success

Decades ago, my high school chemistry teacher slowly released hydrogen sulfide (which produces a smell like rotten eggs) from a hidden container he opened just before we entered his classroom. A few minutes after we took our seats and he began his lecture, a foul odor permeated [the] classroom. We groaned, laughed, looked around for the offending source. To an outside observer entering our class at that time, we would have appeared unfocused and definitely not learning anything. This demonstration, however, literally led me by the nose to follow my teacher's description of the diffusion of gases through other gases. It is likely that during that class I created two or three pathways to the information about gas diffusion that I processed through my senses and ultimately stored in my long-term memory. Since then, that knowledge has been available for me to retrieve by thinking of an egg or by remembering the emotional responses as the class reacted to the odor permeating the room. Once I make the connection, I am able to recall the scientific facts linked to his demonstration.

Event memories, such as the one that was stored that day in chemistry class, are tied to specific emotionally or physically charged events (strong sensory input) and by the emotional intensity of the events to which they are linked. Because the dramatic event powers its way through the neural pathways of the emotionally preactivated limbic system into memory storage, associated scholastic information gets pulled along with it. Recollection of the academic material occurs when the emotionally significant event comes to mind, unconsciously or

consciously. To remember the lesson, students can cue up the dramatic event to which it is linked.

Source: Willis, J. (2007). Brain-Based Teaching Strategies for Improving Students' Memory, Learning, and Test-Taking Success. *Childhood Education*, 83(5), 310.

3. Screening for Depression

Depression is the second most common chronic disorder seen by primary care physicians.¹ On average, 12 percent of patients seen in primary care settings have major depression.² The degrees of suffering and disability associated with depression are comparable to those in most chronic medical conditions.³ Fortunately, early identification and proper treatment significantly decrease the negative impact of depression in most patients.⁴ Most patients with depression can be effectively treated with pharmacotherapeutic and psychotherapeutic modalities.⁵

Depression occurs in children, adolescents, adults, and the elderly. It manifests as a combination of feelings of sadness, loneliness, irritability, worthlessness, hopelessness, agitation, and guilt, accompanied by an array of physical symptoms.⁶ Recognizing depression in patients in a primary care setting may be particularly challenging because patients, especially men, rarely spontaneously describe emotional difficulties. To the contrary, patients with depression who present to a primary care physician often describe somatic symptoms such as fatigue, sleep problems, pain, loss of interest in sexual activity, or multiple, persistent vague symptoms.⁷

Writing in the Workplace

In almost any job or career you can think of, you will be expected to use writing in some way to do your work. Consider these anecdotes:

- A few years ago a student planning to attend law school asked me what he could do now to prepare himself for law school. I called an old friend who is a lawyer to ask what I should tell my student. My friend offered two bits of advice: (1) get good grades, and (2) take as many writing courses as possible. Writing, my friend said, is the most important thing lawyers do.
- A college friend is a management trainer for a large insurance company. Every aspect of her job involves some kind of writing: training materials, memos, reports, multimedia presentations, and formal email messages. Effective writing is a central reason she is an effective manager.
- One of my colleagues teaches nursing. Her students spend a lot of time as interns in hospitals learning how to take a patient's pulse and blood pressure, obtain blood samples, set up IVs, and administer medication. They also learn to write. Communicating with doctors and other nurses is one of the most crucial aspects of a nurse's job, and much of it is done through writing. Without good writing skills, my colleague says, nurses could not care for their patients effectively.

These anecdotes underscore the importance of writing in different work environments and illustrate the different ways that writing enables people to do their jobs well. Professionals already recognize this fact. In one recent survey, 73% of employers indicated that they looked for job candidates with strong written communication skills and listed having such skills as one of the three most important qualities in a job applicant (along with leadership skills and the ability to work as a team member).¹ And because the modern workplace is changing rapidly, you are more likely than ever to be expected to communicate effectively in writing in a number of different media, including traditional print reports, proposals, letters, and memos as well as email, PowerPoint, blogs, wikis, and other social media and digital formats. To succeed in the workplace, you must know how to write well.

FOCUS THINK DIFFERENTLY ABOUT YOUR WRITING

Examine a piece of your own writing that you finished recently. What do you notice about your writing? What strengths or weaknesses do you see? What might this piece of writing suggest about you as a writer? Now think about how you might present yourself as a writer to a potential employer. What would you say to that employer about your writing? What have you learned about writing that might appeal to an employer?

Think of any writing assignment as career training. The better you can write, the more likely you are to succeed in your chosen career. Use your college writing assignments to develop your writing skills in preparation for the writing you will do in your future career. And if you have other kinds of writing experience, such as writing for your school newspaper or developing promotional materials for a student organization, put them on your resume.

¹ Moore, K. Study: 73% of Employers Want Candidates With This Skill. 7 (April 2016). *Inc.com*, www.inc.com/kaleigh-moore/study-73-of-employers-want-candidates-with-this-skill.html.

EXERCISE 1B

Talk to a few people you know about the writing they do for their jobs. Try to find people who work in different kinds of jobs. For example, maybe you have a relative who is a salesperson, a friend who is a physical therapist, or a neighbor who manages a restaurant. Ask them to describe any writing they do in their jobs and the media they regularly use, such as websites, email, YouTube, and other social media. Ask them about the challenges they face as writers in their workplaces. Also ask them for their advice about preparing for workplace writing. If you have had a job or hold one now, consider asking your coworkers about the writing they do for their jobs and think about any writing you have been asked to do in your job. Then write a brief report for your classmates in which you share what you learned from this exercise about workplace writing—or about writing in general.

Writing as a Citizen

The idea that citizens must be educated in order for democracy to work is deeply embedded in American culture. It is known as the Jeffersonian ideal, which imagines a free and thriving society based on a productive, educated citizenry. Today, “educated” also means “literate,” and it’s hard to imagine being an active part of society without writing. In fact, we write to participate in our society in many different ways, from political campaigns to consumer advocacy. Consider these examples:

› Because of a budget deficit, your state legislature is considering a tuition increase as well as large cuts in funding

for state colleges and universities. Members of your college community, including students, have written letters, emails, and tweets to legislators urging them to vote against the funding cuts and the tuition hike. Some students have written editorials for the school newspaper expressing opposition to the budget cuts. To organize a rally at the state capitol, students use Twitter, Facebook, email, and blogs, all of which provide information about the rally and background information about the proposed state budget.

Sheila Fitzgerald/Shutterstock.com

› A developer has proposed building a giant new retail store in your town. Some local businesspeople are concerned that businesses on the town's main street will suffer if the new store is built. Residents opposed to the new store have organized a citizens' group and created a Facebook page and Twitter account to advocate for their position. They post information about the proposed store and share opinions

about its potential impact on the town. They also write letters to the local newspaper and distribute flyers to local businesses. Other residents, concerned about the town's slow economic growth, support the new store and have expressed their support on a blog and in articles and letters they have written for local publications. They also circulate a YouTube video to explain their support for the new store.

› The owners of a major league sports team in your city have threatened to leave the city if a new stadium is not built to replace the aging stadium that the team currently plays in. The team is popular and important to the city, and many residents support the proposal for a new stadium. Other residents oppose the plan on the grounds that it

will increase taxes without creating new jobs. These residents form a community organization to publicize their concerns. They use social media to explain what they believe will be the impact of a new stadium. They also write letters and emails to government officials, and send press releases to local TV stations and online news websites.

These scenarios illustrate how we can use writing to participate directly in important discussions, decisions, and events that affect our lives. Writing is a way for individual citizens to express their opinions and share information; it is a way for citizens to take action as members of their communities. Through writing, whether in a traditional print form such as a letter to an editor or in emerging new forms of social media, citizens can shape the ideas, opinions, and actions of others involved in the situation at hand. In all these instances, writing helps transform the world.

FOCUS THINK DIFFERENTLY ABOUT YOUR WRITING

Have you ever written a letter or email to a politician or business leader to express your opinion or voice a concern? Have you ever written a response to a blog or tweeted to share your perspective on an issue or controversy? Have you ever posted a comment on an article or editorial on a news website? If so, what prompted you to do so? Why did you choose to write in that situation? To what extent do you think your writing made a difference—to you or to anyone else who might have read what you wrote?

A well-written email, a carefully crafted blog post, or even a provocative tweet can often be more effective than a phone call to express a concern, request an action, or raise awareness about an issue.

EXERCISE 1C

Think about an issue that concerns you. Maybe there is a controversy on your campus or in your town that affects you somehow. (On my campus, for example, the university president canceled a popular annual student picnic because of concerns about alcohol abuse and vandalism, which led to an outcry among students and some faculty.) Or you might have a special interest in an issue in your state or in the nation, such as standardized testing in schools or the creation of wind farms in rural or wilderness areas. Now consider how you might best make your opinion heard in public discussions about this issue. Could you write a letter or email to someone in authority who is involved in the situation, such as a politician or business leader? What about a letter to the editor of your local paper or school newspaper? A blog post? A Facebook page? A flyer? Maybe a formal proposal intended for someone in a position of authority? Decide what kind of writing you think would work best in this situation and explain why. Then write it.

Alternatively, if you have ever written out of concern about an issue that was important to you, write a brief essay describing that situation and explaining what you wrote. To what extent did your writing in that situation make a difference to you or others involved?

Writing to Understand Ourselves

A few years ago my family threw a surprise party to celebrate my father's 70th birthday. Many friends and relatives would attend, and we wanted to do something special to celebrate my father's life. I decided to create a video that would be a kind of documentary about him. With help from my siblings, I spent several months collecting old photographs and memorabilia, gathering facts about my father's childhood and working life, and interviewing friends and relatives about their experiences with him. Using this material, I created a 20-minute video that celebrated the important aspects of his life, including his military service and his family. As I composed that video, certain themes began to emerge about my father. I learned a lot about him that I hadn't previously known. More important, I gained a deep appreciation for the impact he had on many other people. Eventually, I screened the video at the surprise party, but composing it gave me a better understanding of my father and the world he grew up in; it also helped me learn about myself and my relationship with him.

My video about my father's life illustrates how writing can help us understand ourselves and the world around us. Here are two other examples:

› A student of mine was a veteran of military service in Iraq during the most intense fighting there between 2004 and 2006. For one assignment, he

wrote a graphic and disturbing essay, in which he struggled to understand what he had experienced in Iraq. His essay revealed that he had deeply

conflicted feelings about the war, because in the midst of the horror he saw, he also developed very special bonds with his fellow soldiers and witnessed profound acts of love and bravery. His essay was one of the most

compelling pieces of writing I have ever received from a student—not because it was about war but because it was such a heartfelt effort by the student to understand some very difficult experiences.

» One of my students was hired by my university's office for international students to help write a newsletter. She was a good writer who earned good grades, but she found writing for international students much more challenging than she had expected. Her supervisor constantly required her to revise her articles. Little by little, however, she began to pinpoint her difficulty, which arose from her lack of familiarity with this new

audience. The more she learned about the international students and their experiences in the United States, the better she appreciated their needs as readers of the newsletter. Her articles improved, and in the process of writing them, she learned a great deal about the international students on our campus and the challenges they face as students in a foreign country. She also learned something valuable about writing and about herself as a writer—and a person.

Writing is a powerful way not only to describe but also to examine, reflect on, and understand our thoughts, feelings, opinions, ideas, actions, and experiences. This capacity of writing is one of the most important reasons we write. In many college classes, you may be asked to write assignments that are designed to help you understand yourself and the world around you in the same way that my student's essay helped him understand his experiences in Iraq. But all of the writing you do in college, whether or not it is directly about your own experiences, presents opportunities for you to learn about yourself.

FOCUS THINK DIFFERENTLY ABOUT YOUR WRITING

Think about a time you wrote—in a journal, a school essay, or on social media—about an experience or issue that was important to you in some way. Why did you choose to write about that experience? Thinking back on it now, what difference did it make to you to write about the experience? What do you think you learned by writing in that situation?

If you approach every writing assignment as an opportunity to learn not only about your subject but also about yourself, you will find that even the most tedious writing assignment can turn out to be a more rewarding experience.

EXERCISE 1D

Write a brief essay about an important experience that helped make you the person you are today. Write the essay for an audience consisting of your classmates, and tell your story in a way that conveys to them why the experience was important to you.

Now reflect on your essay. Did you learn anything—about the experience or about yourself—as a result of writing your essay? Did writing about your experience change your view of the experience in any way? What did writing this essay teach you about yourself? What did it teach you about writing?
